PROFILE

I'm a passionate fresh graduate, aspiring to become a web developer who yearns for personal and career growth, collaboration, teamwork, and to develop real-world projects. Even if I don't yet fully meet all the qualifications or possess every required skill, I am confident that my hard work and perseverance will allow me to quickly adapt and grow as I begin working with your company.

EXPERIENCE

Personal Projects

2021-2022

- Developed a responsive YouTube clone with a light and dark mode theme using HTML, CSS, Bootstrap, and JavaScript.
- Developed a responsive Instagram clone using HTML, CSS, Bootstrap, JavaScript, and jQuery.
- Developed a food ordering system using the C programming language.

Academic Projects:

Project Leader

2023

- Developed a bank management system using Java NetBeans with a MySQL database.
- Developed a responsive e-commerce website for skill purchases using HTML, CSS, JavaScript, Bootstrap, and MySQL.
- Developed a responsive library management system using HTML, CSS, JavaScript, Bootstrap, and MySQL.
- Developed a responsive blogging website using HTML, CSS, and JavaScript.

2024

- Developed a web-based management system integrating IoT-RFID and fingerprint authentication, utilizing Laravel, MySQL, Python, Flask API, Bootstrap, and JavaScript.

2025

- Developed a Barangay management system featuring information and report management using HTML, CSS, Bootstrap, and JavaScript.

OJT Project:

- Developed a system (Bula Data Management System) with the Laravel Filament framework to consolidate data from multiple offices. The solution speeds data collecting and ensures accessibility even after natural disasters.
