PROFILE

To acquire valuable knowledge and skills in a real-world setting to supplement what I've learned in school. In exchange, I offer my services and determination to be an asset to your company for the duration of my training.

EXPERIENCE

Personal Projects or Hobbies

2021-2022

- I developed a responsive YouTube clone with a light and dark mode theme using HTML, CSS, Bootstrap, and JavaScript.
- I developed a responsive Instagram clone with HTML, CSS, Bootstrap, JavaScript, and jQuery.
- I developed a food ordering system using C language programming.

Academic Projects:

2023

Project Leader

- Developed a bank management system using Java NetBeans with a MySQL database.
- Created a responsive e-commerce website for skill purchases using HTML, CSS, JavaScript, Bootstrap, and MySQL.
- Developed a responsive library management system using HTML, CSS, JavaScript, Bootstrap, and MySQL.
- Developed a responsive blogging website using HTML, CSS, and JavaScript.

2024

- Created the web-based management system of our capstone project using Laravel, MySQL, Python, Bootstrap, and JavaScript.

2025

- Developed a Barangay management system featuring information and report management using HTML, CSS, Bootstrap, JavaScript.

OJT Project:

- I developed a Bula Data Management System using the Laravel Filament platform that unifies diverse data from various offices. This system streamlines the collection of data and ensures accessibility even after natural calamities.
